
(a) a = 0
(b) a = 1
(c) a = 2
y
x (signal)
(d) ρ falls, λ should not
ρ or λ
ρ (Pearson)
λ (KSG on normal scores)
strength of the monotonic non-linearity a
(e) λ estimators
λ
exact = r
KSG on normal scores (maps)
Knuth bins (old production)
Knuth bins on normal scores
rank (equal-count) bins
KSG on raw values
strength of the monotonic non-linearity a
